

## [ANDEN CO., LTD announces achievement of CMMI® Level 3](#)

March 1, 2013 (Aichi, Japan) - ANDEN CO., LTD are pleased to announce that our Software Engineering Center at Engineering Department 2 has been appraised at Level 3 Ver.1.3 of the CMMI Institute's Capability Maturity Model Integration (CMMI). The appraisal was performed by NEC Communication Systems, Ltd.

An appraisal at maturity level 3 indicates the organization is performing at a "defined" level. At this level, processes are well characterized and understood, and described in standards, procedures, tools and methods which means our Software Engineering Center, through these standard processes, develops and provides products with stable quality and on-time delivery.

The electric control systems have become increasingly sophisticated due to the recent improvement in safety and environmental performances. Thus the in-vehicle software for vehicle equipment has become larger and its functions have become more complicated.

We support complicated control systems by means of our high quality technology which is demonstrated by the achievement of CMMI level 3.
